9. Earphone Plug In
10. Microphone

The Rearview Mirror Handsfree Car Kit is an innovative wireless device that utilizes the latest Bluetooth technology to communicate with your compatible phone. It allows you to talk through its built in loudspeaker and its external microphone without the need to hold the phone or take your hands off the steering wheel.

Simple for anyone to install and can be used in any car. Just clip the unit over the existing rearview mirror and plug it into your vehicle's lighter adapter. The unit allows you to answer, end, reject, redial, place calls, or adjust the loudspeaker volume by the simple press of a button.

The unit supports voice-dialing phones, which enables you to dial your favorite contacts without the need to touch your phone, and allows you to concentrate on driving your car.
